Tom – Tim and I thought it would be helpful to OPP to have some of the backstory on the ethanol plant prior to the discussion with UNL as there are elements that Tim and I can share more directly with OPP than we would with the University as they are more compliance/regulatory related. Following that we can work with UNL to find a time when they can share what they have been experiencing with their bees and hearing from others and cover whatever they were hoping to discuss with us. I suspect there will be some sort of ask from the University as well.

Tim had mentioned that a year ago there were some other discussions regarding this facility that included OPP. Some of those included Mike Goodis, Meredith Laws, and Donna Davis. Wanted to share that with you in the event you thought they may also have an interest and/or might be able to provide you some background as well.

Let me know if we need to try a different date/time.

Have a great weekend!

Jamie
